PROFESSIONAL SUMMARY

Adept Full Stack Developer with hands-on experience in React and Python, specializing in developing engaging user interfaces and robust backend systems. Proven ability to deliver high-impact projects through efficient code management and collaboration with cross-functional teams.

TECHNICAL SKILLS

React.js, Python Programming, Full Stack Development, Git Version Control, JavaScript & Node.js, UI/UX Design, API Integration, Database Management

KEY HIGHLIGHTS (FULL STACK DEVELOPER)

- Designed and developed dynamic user interfaces using React, ensuring seamless user experiences for high-traffic applications.
- Utilized Python to build scalable backend services, enhancing system performance and reliability through efficient code optimization.
- Implemented robust Git workflows, improving code maintainability and collaboration among development teams.
- Successfully integrated APIs to enable real-time data synchronization, boosting application functionality and user engagement.
- Managed databases for storing critical information, ensuring data integrity and security in high-traffic applications.
